## Vehicle Specific Installation

When installing a SIRIUS Portable or Dock & Play radio in your vehicle, TSS-Radio offers a wide variety of vehicle specific installation mounts to ensure a factory look and feel. From sedans to suvs to big rigs - American or Import - chances are TSS-Radio can meet your needs.

2004 - 2008 Pontiac Grand Prix shown above

- Docking station is secured to vehicle specific mount
- Mount uses vehicle's existing bolt structure to ensure proper fit and finish

### • Additional sampling of custom mounts

- Cup holder mount (SR33)
- This mount will put your SIRIUS radio on a pedestal above your vehicle's cupholder.

- Pro-Fit LoBoy (LB600BX)
- ideal solution for those looking for a low profile mount

TSS-Radio also offers an array of motorcycle mounts including Harley Davidson, Honda, Kawasaki, Suzuki and Yamaha. Most custom mounts are chrome plated to add that extra cosmetic appeal.

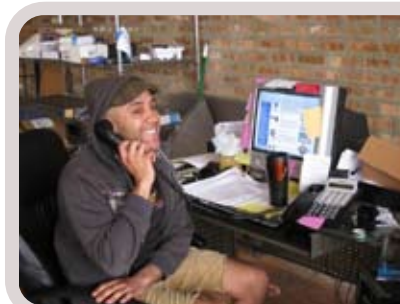

# OTHER ACCESSORIES

## Achieve Better Sound

With some factory (OEM) or aftermarket stereo systems as complex as they are, achieving good quality sound can sometimes be challenging. To help overcome this and achieve the best possible sound when connecting a Portable or Dock & Play radio, we recommend using an Auxiliary Input Adapter. From Universal to vehicle specific, the right adapter will have you enjoying your SIRIUS commercial-free music the way it was meant to be heard - clean, crisp and dynamic.

### How to ensure the best sound quality?

- Know your specific vehicle make, model (trim-package) and head-unit style or model if aftermarket. Confirm if vehicle has CD changer and type such as in-dash or separately mounted.
- Call TSS-Radio to discuss available options for your specific application

"I'm SIRIUSLY excited to help you".
